**BIKE SAFELY**

**Protect Your Head**
Wear a helmet. Make sure it fits snuggly just above your eyebrows and buckles under your chin. Don’t listen to music while you ride.

**Get Your Bike Ready**
Check your brakes and wheels and adjust your seat as needed. Make sure accessories like water bottles and lights are properly attached.

**Be Visible**
Use both front and rear reflectors. At night and in low light or fog, use both a headlight and taillight.

**Look, Signal and Look Again**
Make eye contact with drivers; don’t assume they will stop. Watch out for parked cars opening their doors into the bike lane.

**Be Predictable**
Use hand signals before you turn or stop. Follow all stop signs and traffic signals. Act like a car in traffic.

**WALK AND RUN SAFELY**

**Be Alert**
Look for cars and bikes from all directions. Don’t listen to loud music or use only one earbud.

**Cross at Corners and Intersections**
This is where drivers expect to see pedestrians, even if there are no stop signs. Make eye contact with drivers before crossing in front of them.

**SHARE THE TRAIL SAFELY**

**Pedestrians Have the Right of Way**
When biking on shared trails and paths keep to the right. Pass on the left after giving an audible warning — use your bell or say “On your left!”.
