

Whenever You're Ready to Carpool, Carpool with Care

Limit carpool size to no more than one passenger per row of seats if not traveling with your social bubble

Avoid touching your eyes, nose, and mouth with unwashed hands or while wearing gloves.

Passenger, sit in the back right-side seat for maximum distancing between driver and rider, or if you have multiple rows of seats, sit diagonally from each other for maximum distancing.

Wash your hands often and use hand sanitizer that contains at least 70% isopropanol.

Avoid physical contact with other passengers when entering and exiting and vehicle and maintain distance inside the vehicle.

Keep the windows open if possible when traveling to increase airflow.

Clean and disinfect vehicle surfaces between carpools: door handles (inside and out), steering wheel, armrests, seatbelt/seat-belt buckles, seats, and knobs (including climate control, radio, glove box, etc..)

Find a consistent carpool partner to limit the number of people with whom you interact, Merge is ideal for identifying an ongoing carpool partner.

Wear a cloth mask that covers your nose and mouth and request your carpool partner wear one as well.

Stay home if you have any one of the symptoms identified by the CDC.
